

HI- INTELLIGENT MINDS

Summer School on
Machine Learning and AI Engineering

When: July 19 to 30, 2027

Where: Institute of Computer Science
at the University of Hildesheim

Who: advanced bachelor's students
in computer science, statistics,
mathematics, physics, etc.

What: Current AI research areas
(e. g. recommendation systems,
time series analysis, LLMs)

Maths for ML and AI foundations

Software engineering for and
with AI systems

(MLOps and trustworthy AI)

Application Deadline: January 31, 2027

Spend two weeks at the **Hi-Intelligent Minds** Summer School. You will start with the essentials and then work on a real machine-learning project. **This year, you will work on an algorithm that recommends things to people.** You will start with the rating matrix and finish with a service that is fair and private. **Learn from the researchers** behind Business Process Reengineering and Factorization Machines, then **master the engineering discipline** – reproducibility, testing, monitoring – that makes a model into a reliable system. **Show us what you've been working on** at a short presentation, and then keep going by signing up for our international master's programmes in **Data Analytics** and **Software Engineering**.

With funding from the:

Federal Ministry
of Research, Technology
and Space

Deutscher Akademischer Austauschdienst
German Academic Exchange Service
